

MOHAMMAD SUHAIL

React.js Developer & Python Backend Engineer

m.suhail54321@gmail.com | +91-7351164945 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven React.js Developer and Python Backend Engineer with 7+ years of experience building scalable web applications and RESTful APIs. Proficient in React.js, JavaScript (ES6+), HTML5, CSS3, Python, Flask, and FastAPI. Skilled in developing high-performance single-page applications (SPAs), API-first backends, and data-driven dashboards. Adept at delivering responsive, accessible, and SEO-optimized frontends alongside robust, secure Python microservices.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, TailwindCSS, Bootstrap, Redux, Next.js, Responsive Design, PWA, DOM Manipulation

Backend & APIs: Python, Flask, FastAPI, REST API, GraphQL, WebSockets, JWT Authentication, OAuth2, Pydantic, SQLAlchemy

Databases: MySQL, PostgreSQL, MongoDB, Redis, SQLite, Database Optimization, Query Tuning

Tools & DevOps: Git, GitHub, GitLab, Docker, AWS (EC2, S3, Lambda), CI/CD Pipelines, Postman, Webpack, Vite, VS Code, Jira

Practices: Agile/Scrum, MVC Architecture, RESTful API Design, OWASP Security, Test-Driven Development (TDD), Performance Tuning, SEO Optimization

PROFESSIONAL EXPERIENCE

Aurionpro | Full Stack Developer (React.js / Python) Nov 2024 – Present | On-site

- Developed scalable React.js single-page applications (SPAs) with reusable component libraries, reducing UI development time by 40%.
- Built high-performance FastAPI backend services handling 10,000+ daily requests with sub-200ms response times, deployed on AWS EC2.
- Implemented JWT-based authentication, role-based access control (RBAC), and OWASP-compliant security practices across React and Python services.
- Created interactive data dashboards using React.js with Chart.js and Recharts, visualizing real-time analytics for business stakeholders.
- Optimized MySQL and PostgreSQL queries improving data retrieval performance by 60% through indexing and query restructuring.
- Integrated Docker containerization and GitLab CI/CD pipelines for automated testing and zero-downtime deployments.

SNM Technologies | Full Stack Developer (React.js / Python) Sep 2023 – Oct 2024 | Remote

- Built a React.js frontend for an enterprise eCommerce platform with dynamic product customization, cart management, and real-time inventory updates via WebSockets.
- Developed Flask REST APIs for product catalog, order management, and user authentication, integrated with MySQL and MongoDB datastores.
- Created Python data processing scripts for automated report generation, stock analytics, and CSV/Excel export functionality.
- Implemented reusable React component library with TailwindCSS, cutting frontend redundancy by 65% across multiple projects.
- Integrated third-party payment APIs (Stripe, PayPal) through FastAPI microservices with webhook handling and secure transaction logging.
- Integrated GitLab CI/CD pipelines reducing release cycles by 50%.

Cargo Flesh Infotech | Frontend Developer (React.js / JavaScript) Oct 2022 – Aug 2023 | Remote

- Built user-centric React.js interfaces improving user engagement by 75% through performance optimization, lazy loading, and code splitting.

- Developed a real-time SaaS chat application frontend in React.js backed by a Python WebSocket server, supporting 500+ concurrent users.
- Created Python Flask APIs for user authentication, message persistence, and chat history retrieval integrated with PostgreSQL.
- Implemented SEO best practices including server-side rendering (SSR) with Next.js, structured data markup, and Core Web Vitals optimization.

SNM Technologies | Full Stack Developer (React.js / Python) *Aug 2018 – Feb 2022 | On-site*

- Architected full-stack web applications using React.js frontends and Python Flask backends, delivering responsive and maintainable codebases.
- Developed comprehensive REST APIs supporting full CRUD operations with JWT authentication and middleware-based authorization.
- Built custom SaaS platforms including CRM, Payroll, Attendance, and Inventory Management with React.js dashboards and Python backends.
- Designed and integrated Python-based data analytics modules for business intelligence dashboards, charts, and exportable reports.

KEY PROJECTS

SaaS eCommerce Platform *(React.js, Next.js, FastAPI, Python, MySQL, Redis, MongoDB)*

- Built a full-stack multi-vendor eCommerce platform with Next.js SSR frontend and FastAPI backend for high SEO performance.
- Integrated Stripe and PayPal payment gateways via FastAPI with PCI-compliant transaction handling, webhook verification, and refund workflows.
- Implemented real-time order tracking with React.js and WebSockets, automated inventory alerts using Python scheduled tasks (Celery + Redis).
- Optimized performance with Redis caching, MySQL indexing, and MongoDB for product catalog — achieving sub-300ms page loads at scale.
- Deployed on AWS (EC2, S3, RDS) with Docker containers and GitHub Actions CI/CD pipeline for zero-downtime releases.

Real-Time Chat Application *(React.js, Python, FastAPI, WebSockets, PostgreSQL)*

- Developed a full-featured real-time chat application with React.js frontend and Python FastAPI WebSocket server.
- Supported 500+ concurrent users with instant message delivery, typing indicators, read receipts, and online presence tracking.
- Built REST API endpoints in FastAPI for user authentication (JWT/OAuth2), message persistence, and paginated chat history from PostgreSQL.
- Implemented end-to-end encryption for private messages and rate limiting to prevent abuse.

Data Analytics Dashboard *(React.js, Python, Flask, MySQL, MongoDB, Chart.js)*

- Built an interactive business intelligence dashboard using React.js with Chart.js and Recharts for real-time data visualization.
- Developed Python Flask APIs to aggregate, transform, and serve data from MySQL and MongoDB to the React frontend.
- Implemented advanced filtering, date-range selection, drill-down charts, and one-click CSV/PDF export features.
- Dashboard served 50+ KPIs including revenue trends, inventory turnover, and customer acquisition metrics in real time.

Inventory & Business Management System (SaaS) *(React.js, Python, FastAPI, MySQL, MongoDB)*

- Built a modular SaaS suite covering Inventory, Payroll, CRM, Attendance, and Invoice Management with React.js dashboards.
- Developed FastAPI microservices for each module with shared JWT authentication gateway and inter-service REST communication.
- Automated dispatch workflows, barcode scanning integration, and predictive stock alerts using Python background tasks (Celery).

- Reduced manual processing time by 70% through workflow automation; used MongoDB for audit logs and MySQL for transactional data.

Rajya Sabha One UI Portal *(React.js, Python, FastAPI, Flask, MySQL, MongoDB)*

- Developed a unified React.js SPA integrating member, citizen, and staff-facing portals for Rajya Sabha digital transformation initiative.
- Built Python FastAPI microservices for parliament data aggregation, Aadhaar authentication, and DigiLocker document verification.
- Implemented secure RBAC with audit logging, end-to-end encryption, and session management across all portals.
- Used Python Flask for legacy data migration scripts, ETL pipelines from old systems, and PDF report generation.

AI-Powered Resume & Job Matching Tool *(React.js, Python, FastAPI, NLP, PostgreSQL)*

- Built a React.js frontend for uploading, parsing, and analyzing resumes with real-time job match scoring.
- Developed Python FastAPI backend with NLP-based keyword extraction and semantic similarity scoring using spaCy and scikit-learn.
- Integrated PostgreSQL for storing candidate profiles, job listings, and match history with advanced full-text search.
- Implemented async processing with Python asyncio and FastAPI background tasks for non-blocking resume analysis at scale.

EDUCATION

Bachelor of Technology – Computer Science *Graduated: 2018*

AKTU University, Lucknow

CERTIFICATIONS & ACHIEVEMENTS

- Full Stack Web Development – Udemy
- MySQL Database with JavaScript – Scaler
- Mentored junior developers in React.js, Python, FastAPI, and Flask best practices
- Delivered 10+ production SaaS applications across eCommerce, Analytics, CRM, and Government domains
